Whether you're new to sustainable packaging or have long embraced eco-friendly practices, Inovar's experts can help you find the right solution for your brand. Our top sustainable options include fully recyclable packaging, packaging made from recycled materials, and reduced waste packaging. Sustainability is central to our business, reflected in initiatives like energy-efficient lighting, paperless systems, water conservation, and optimized waste management.

▼ SUSTAINABILITY PARTNERSHIPS & CERTIFICATIONS:

Inovar cultivates partnerships with various sustainability affiliations spanning multiple platforms. These collaborations enable us to remain at the forefront of technological advancements, ensuring that we consistently offer our customers the most sustainable solutions. Those affiliations include:

UPM Raflatac

▼ BENEFITS & SOLUTIONS:

FULLY RECYCLABLE PRIMARY PACKAGING

As a proud member of the Association of Plastic Recyclers (APR) and with multiple APR-recognized materials in our Inovar360® portfolio, we stay up-to-date on the latest guidelines to ensure your packaging meets recyclability standards, contributing to a greener future.

PACKAGING CREATED WITH RECYCLED MATERIALS

We are dedicated to minimizing environmental impact by using recycled materials in our packaging. Our pressure-sensitive labels are made from certified Post-Consumer Recycled (PCR) materials, with options for recycled liners, including Post-Consumer Waste (PCW) labels. Choosing recycled packaging supports sustainability and the circular economy.

REDUCED WASTE PACKAGING OPTIONS

In our efforts to promote waste reduction, we offer packaging solutions with minimized environmental footprint. Our thinner liners, sustainable paper products from responsibly managed forests, and Ino-Reduce ECL labels reduce resource consumption and waste without compromising quality. These options help you meet sustainability goals while enhancing operational efficiency.
